LIFE AND ITS PHYSICAL BASIS In a letter from a famous thinker and writer lately received, commenting upon some statement concerning a physiologic function, my correspondent writes: I am, as a physiologist, quite opposed to regarding life as an entity instead of a function. With this bit of unscientific dogmatism a popular plebifactor of science is well satisfied and proceeds in this way: Chemistry has now told us that Life as an entity has no more existence than the phlogiston of the earlier chemists, and that the series of phenomena to which we give the name of life are changes undergone by complex compounds of carbon composing very large and unstable compounds. The only proper answer to this is a choice example of curbstome slang, more forcible than polite. It is itself a compound, very large and unstable, but of simple construction, being made up...
