The 5th International Workshop on Medical Imaging and Augmented Reality, MIAR 2010, was held at the China National Convention Center (CNCC), Beijing, China on September 19-20, 2010. MIAR has remained a truly international meeting, bringing together - searchers from all fields related to medical image analysis, visualization and targeted intervention. In recent years, technical advances in therapeutic delivery and a growing demand for patient-specific treatment have accelerated the clinical applications of MIAR-related techniques. Imaging plays an increasingly important role in targeted therapy, with interventions such as drug or gene therapy relying on more accurate delivery tailored to individual patients. Rapid progress in surgical methodologies, such as those with robot assistance, demands precise guidance from both preoperative and intraoperative imaging. The volume of data available from existing and emerging imaging modalities leads to a desire for more automated analysis for diagnosis, segmentation and registration. Research in this rapidly developing area is highly multi-disciplinary, integrating research in life sciences, physical sciences, engineering, and medicine. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
