*Excellent electronic book and helpful one. Better then never, though i am quite late in start reading this one. You wont truly feel monotony at whenever you want of your time (that's what catalogues are for relating to when you question me).*

Heres a way to teach the same grade-level content to students with varying reading skills! The same information is written at three different levels: below grade level, at grade level, and above grade level. All the students in your class can read the passage and have the information they need to respond to the same six questions that evaluate their comprehension of the subject matter. The curriculum topics for science, geography, history, and language arts are correlated to the McREL standards and benchmarks. The reading levels of the passages are calculated according to the Flesch-Kincaid Readability Formula.
