

Overfishing: The Icelandic Solution

By Hannes H. Gissurarson

Institute of Economic Affairs. Hardback. Book Condition: new. BRAND NEW, Overfishing: The Icelandic Solution, Hannes H. Gissurarson, In this monograph, Professor Gissurarson explains the Icelandic model of fisheries management, Individual Transferable Share Quotas (ITQs), implemented in 1979 to reverse the decline in Icelandic fish stocks. Access to Icelandic fisheries was traditionally open to all. In the 1960s and 1970s excessive catches of herring and then cod led to a decline in stocks of these important species in Iceland's waters. In response, Iceland's government imposed restrictions on the number of days trawlers could put to sea to catch certain species. This led to fishing Derbies, where fishermen competed to catch as many fish as possible in the limited time available. Inevitably, catches continued to exceed sustainable levels. Starting in 1979, the Icelandic government gradually introduced a system of individual transferable share quotas (ITQs), which essentially give boat owners the right to catch a specific proportion of the total allowable catch (TAC) of certain species. If a boat owner does not wish to use all his ITQ he can sell part of it to someone else. This encourages more efficient use of the capital invested in boats and equipment. Because ITQs entitle...
