Brand New Book ***** Print on Demand *****.Excerpt from Horticulture: A Text Book for High Schools and Normals Before taking up the special problems of gardening and fruit growing, let us make a rapid survey of the broader phases of plant life. Importance of Plants. - All human life, and indeed, all animal life is dependent upon plants for sustenance. Most plants are able to obtain their nourishment from soil and air. The food thus produced is stored in the form of fruits, vegetables, and other crops, and is used for the maintenance of men and lower animals. Without plants no animal life could long exist; as animals are not able to obtain their nourishment directly from soil and air alone. Conditions for Plant Growth. - Because of the great value of plant growth to human life, it is quite necessary that we study carefully the needs of all plants and the special needs of all our crop plants. The needs of plants may be grouped under six heads: (1) warmth, (2) moisture, (3) food supply, (4) air, (5) light, (6) freedom from enemies. If we are able to supply the best conditions under each of these heads we will secure the greatest crops. The great problems of gardening and orcharding are to place the growing plants in such favorable conditions. Warmth; Temperature. - Plants are not alike in their temperature requirements. Some grow in cold regions where snow and ice surround them. Others are found in torrid regions where frost never occurs. Wide differences are seen in the warmth required by our fruits and vegetables in the temperate zone. Lemons, oranges, certain grapes, and bananas can endure very little, if any freezing weather,...
