

Towards Policy Relevant Environmental Modeling; Contextual Validity and Pragmatic Models: Usgs Open-File Report 2000-401 (Paperback)

By Scott B Miles

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. What makes for a good model? In various forms, this question is a question that, undoubtedly, many people, businesses, and institutions ponder with regards to their particular domain of modeling. One particular domain that is wrestling with this question is the multidisciplinary field of environmental modeling. Examples of environmental models range from models of contaminated ground water flow to the economic impact of natural disasters, such as earthquakes. One of the distinguishing claims of the field is the relevancy of environmental modeling to policy and environment-related decision-making in general. A pervasive view by both scientists and decision-makers is that a good model is one that is an accurate predictor. Thus, determining whether a model is accurate or correct is done by comparing model output to empirical observations. The expected outcome of this process, usually referred to as validation or ground truthing, is a stamp on the model in question of valid or not valid that serves to indicate whether or not the model will be reliable before it is put into service in a decision-making context.
