Brand New Book ***** Print on Demand *****.Climate change, once considered an issue for a distant future, has moved firmly into the present. This National Climate Assessment concludes that the evidence of human-induced climate change continues to strengthen and the impacts are increasing across the country. Americans are noticing changes all around them. Summers are longer and hotter, and extended periods of heat last longer than any living American has ever experienced. Winters are generally shorter and warmer. Rain comes in heavier downpours. People are seeing changes in the length and severity of seasonal allergies, the plant varieties that thrive in their gardens, and the kinds of birds they see in any particular month in their neighborhoods. Other changes are even more dramatic. Residents of some coastal cities see their streets flood more regularly during storms and high tides. Inland cities near large rivers also experience more flooding, especially in the Midwest and Northeast. Insurance rates are rising in some vulnerable locations, and insurance is no longer available in others. Hotter and drier weather and earlier snowmelt mean that wildfires in the West start...
